

Vision plans that help you see healthier employees and money-saving results

Better value, better vision

Our eye care plan gives your employees and their covered dependents more choices and flexibility so they get the care they need when they need it.

Easy access to quality eye care encourages employees to get exams on a regular basis, which can improve your bottom line. When employees use their vision benefits, eye care professionals are able to diagnose and treat them for health problems like diabetes, high blood pressure and heart disease. This keeps your employees healthy and prevents high-cost medical claims.

Convenience and choice

With **PriorityVision**SM, your employees will have access to thousands of eye care providers and flexible appointment times on weekdays, evenings, and weekends. Your employees can see an eye care professional at a private practice or stop in at one of the following stores:

- LensCrafters®
- Target Optical®
- Pearle Vision®
- JCPenney Optical®
- Sears OpticalSM

Affordable eye care

Our plans pair eye exams with eyewear coverage and discounts so you can provide your employees with a plan that fits their lifestyles and your company's budget. Employees will save on glasses and other eye care services, even if they've already reached their maximum benefit for the year. You'll get flexibility and value without sacrificing quality or convenience.

Hassle-free service

Our focus is on making vision care easier. That's why you and your employees get 24/7 access to providers, benefit plans, claims and other information when you log on to priorityhealth.com or contact Customer Service.

Put Priority Health to work for you

It's easy to get the care and support you need. Let Priority Health show you what **PriorityVision** can do for your employees' health and your bottom line.

Did you know?

Vision problems account for more than \$8 billion in lost productivity every year.
