Prior authorization criteria

The following requirements need to be met before this drug is covered by Priority Health Medicare. These requirements have been approved by the Centers for Medicare and Medicaid Services (CMS), but you may ask us for an exception if you believe one or more of these requirements should be waived.

1. Must be used for a medically-accepted indication*
2. For advanced renal cell carcinoma, must first try and fail sunitinib (Sutent) or sorafenib (Nexavar)
3. For advanced hormone receptor-positive, HER2-negative breast cancer in postmenopausal women:
 - a. Must have tried anastrozole (Arimidex) or letrozole (Femara)
 - b. Must not have had prior treatment with exemestane (Aromasin)
 - c. Must be used in combination with exemestane (Aromasin)
 - d. Must have an Eastern Cooperative Oncology Group (ECOG) performance status of 2 or less

Medically-accepted indication*

This drug is only covered under Medicare Part D when it is used for a medically accepted indication. A medically accepted indication for a drug or biologic used in an anti-cancer chemotherapeutic regimen is a use that is *either*:

- approved by the Food and Drug Administration. (That is, the Food and Drug Administration has approved the drug for the diagnosis or condition for which it is being prescribed.)
- supported by one of the following references (known as compendia): National Comprehensive Cancer Network (NCCN) Drugs and Biologics Compendium, Micromedex DrugDex, American Hospital Formulary Service-Drug Information, Clinical Pharmacology, or Lexi-Drugs
- — or — supported in peer-reviewed medical literature appearing in regular editions of approved publications

Additional information

Note: When criteria are met, coverage duration is 1 year.
