 Drug product: Digitek[®] 0.25 mg tablet
 Start date (or date of next dose): _____
 Date of last dose (if applicable): _____
 Dosing frequency: _____

Prior authorization criteria

The following requirements need to be met before this drug is covered by Priority Health Medicare. These requirements have been approved by the Centers for Medicare and Medicaid Services (CMS), but you may ask us for an exception if you believe one or more of these requirements should be waived.

For this drug to be covered, the patient must meet the following criteria:

1. Must be used for a medically-accepted indication*
2. For patients ≥ 65 **AND**
 - a. A diagnosis of atrial fibrillation: Digitek[®] 0.25 mg is covered (no additional criteria to be met)
 - b. A diagnosis of heart failure: Provider must attest to consideration of the benefit-risk ratio for digoxin doses exceeding 0.125mg per day
3. For patients < 65 : Digitek[®] 0.25 mg is covered for both atrial fibrillation and heart failure

The American Geriatric Society (AGS) classified digoxin as a high risk medication when used in persons age 65 and older at doses exceeding 0.125 mg each day. AGS recommends limiting the use of digoxin in the elderly to treatment of atrial fibrillation (do not use for heart failure).

Additional information

Note: When criteria are met, duration of approval will be 1 year.

Medically accepted indication*

This drug is only covered under Medicare Part D when it is used for a medically accepted indication. A medically accepted indication is a use of the drug that is *either*:

- approved by the Food and Drug Administration. (That is, the Food and Drug Administration has approved the drug for the diagnosis or condition for which it is being prescribed.)
- — or — supported by certain reference books. (These reference books are the American Hospital Formulary Service Drug Information and the DRUGDEX Information System.)

Priority Health Precertification Documentation
