Precertification Requirements

Before this drug is covered, the patient must meet all of the following requirements:

1. Diagnosis of congenital alpha₁-antitrypsin deficiency
2. Clinically evident emphysema
3. A predicted FEV₁ value between 30% and 65%
4. A serum alpha1-antitrypsin (AAT) level less than 11 mmol/L
 - 11 mmol/L is equal to 80 mg/dL if measured by radial immunodiffusion

- 11 mmol/L is equal to 50 mg/dL if measured by nephelometry
5. Must be a non-smoker

Note: Authorization for indications, dosing, or a route of administration not approved by the Food and Drug Administration (FDA) or recognized in CMS-accepted compendia (e.g. DrugDex, AHFS, U.S. Pharmacopeia, and also Clinical Pharmacology for oncology indications only) require supporting evidence for coverage. Please provide two published peer-reviewed literature articles supporting the appropriateness of the drug, the dosing of the drug, or the route of administration to be used for the identified indication.

Priority Health Precertification Documentation

A. What condition is this drug being requested for?

- congenital alpha₁-antitrypsin deficiency
- Other – the patient’s condition is: _____
Rationale for use: _____

B. Does the patient have clinically evident emphysema?

- Yes
- No – rationale for use: _____

C. What is the patient’s predicted FEV₁?

Date: _____ Value: _____ %

D. What is the patient’s serum AAT level?

Date: _____ Provide one of the following values: _____ mmol/L
_____ mg/dL (by radial immunodiffusion)
_____ mg/dL (by nephelometry)

E. Does the patient currently smoke?

- No
- Yes – rationale for use: _____
