Date of last dose (if applicable): _____
Dosing frequency: _____

Prior authorization criteria

The following requirements need to be met before this drug is covered by Priority Health Medicare. These requirements have been approved by the Centers for Medicare and Medicaid Services (CMS), but you may ask us for an exception if you believe one or more of these requirements should be waived.

1. Diagnosis of congenital alpha₁-antitrypsin deficiency with emphysema
2. Must have a predicted FEV1 value between 30 and 65%
3. Serum AAT level must be: less than 11 mmols/L, or
 less than 80 mg/dL if measured by radial immunodiffusion, or
 less than 50 mg/dL if measured by nephelometry

Medically accepted indication

This drug is only covered under Medicare Part D when it is used for a medically accepted indication. A medically accepted indication is a use of the drug that is *either*:

- approved by the Food and Drug Administration. (That is, the Food and Drug Administration has approved the drug for the diagnosis or condition for which it is being prescribed.)
- — or — supported by certain reference books. (These reference books are the American Hospital Formulary Service Drug Information and the DRUGDEX Information System.)
