ICD-10 Diagnosis code(s): _____

Precertification Requirements

Patient must meet all of the following criteria:

1. Diagnosis of multicentric Castleman disease (MCD)
2. Must be HIV negative
3. Must be human herpesvirus (HHV) negative
4.

Note: Authorization for indications, dosing, or a route of administration not approved by the Food and Drug Administration (FDA) or recognized in CMS-accepted compendia (e.g. DrugDex, AHFS, U.S. Pharmacopeia, and also Clinical Pharmacology for oncology indications only) require supporting evidence for coverage. Please provide two published peer-reviewed literature articles supporting the appropriateness of the drug, the dosing of the drug, or the route of administration to be used for the identified indication.

All fields must be complete and legible for review. Your office will receive a response via fax. No changes made since 09/2018
