**I. POLICY/CRITERIA**

- A. Coverage is available for standard orthotics/support devices only. Restrictions and limitations, some of which are described below, apply.
- B. Orthotics/support devices are defined as rigid or semi-rigid devices that are worn externally to:
  - 1. Support a body part weakened by disease or injury, **or**
  - 2. Restrict or eliminate motion in a diseased or injured body part.
- C. The orthotic/support device must be prescribed for a medical condition and worn for more than activity-specific use.
- D. Pre-authorization of orthotics/support devices greater than \$1,000.00 is required for Commercial and Medicare members. Pre-authorization of orthotics/support devices greater than \$500.00 is required for Medicaid/Healthy Michigan Plan members.
- E. Limits/Indications
  - 1. Some examples of **covered** support devices are:
    - a. Splints
    - b. Support stockings (Jobst, TEDS)
    - c. Knee braces are considered medically necessary when InterQual® criteria are met.
  - 2. The following are **not a covered** benefit:
    - a. Shoes, shoe inserts and other supportive devices of the feet. Coverage exceptions are defined in *Medical Policy # 91420, Orthotics: Shoe Inserts and Orthopedic Shoes*.
    - b. Orthotics/support devices worn only during elective activities (e.g., sports).
    - c. Elastic or neoprene sleeves (e.g., ace bandages, knee sleeves).
    - d. Any non-rigid (i.e., without stays) orthotic/support device.
    - e. Personal comfort or convenience orthotic/support devices, or household items.
    - f. Upper extremity myoelectric orthoses (e.g., MyoPro®; Myomo, Inc.): The United States Food and Drug Administration (FDA) granted

510(k) approval as a Class 2 device, assigned the product code **OAL: Exercise Equipment, Powered, Emg-Triggered**. Priority Health likewise considers the Myomo MyoPro myoelectric limb orthosis (and similar devices) as exercise equipment and not a covered benefit.

3. If quality and effectiveness are comparable, the least costly device will be covered.
4. Professional fees related to dispensing or customizing the item or educating or training the member are covered as part of the orthotic/support device cost. These services are the responsibility of the vendor or provider and are not reimbursable as a separate fee. Charges from facility or vendor employees are not a covered benefit.
5. The decision to repair or replace orthotics/support devices will be at the discretion of the Health Management department. The following guidelines apply:
  - a. Repairs or maintenance as a result of normal use are a covered benefit.
  - b. Repairs or maintenance as a result of misuse or abuse are not a covered benefit and are the responsibility of the member.
  - c. Replacement of orthotic/support device damaged by normal use or required due to body growth is a covered benefit.
  - d. Replacement of orthotic/support device as a result of misuse or abuse is not a covered benefit and is the responsibility of the member.
  - e. Replacement of lost or stolen orthotic/support device is not a covered benefit.
  - f. Requests for replacement orthotic/support device when existing orthotic/support device is not damaged requires a physician's statement documenting a change in the member's condition and the rationale for the replacement item. The decision to replace or upgrade the device is at the discretion of the Health Management Department.
6. Coverage is limited to one (1) orthotic/support device unless replacement is covered under the replacement guidelines in this policy. Multiples of an item may be a covered benefit if medically indicated (e.g., post-mastectomy bras (2 every 6 months), support stockings (12 per year or 6 pair), AFOs (4 per year or 2 pair)).

**Special Notes:** See *Orthotics—Shoe Inserts and Orthopedic Shoes Medical Policy #91420*.

## **II. MEDICAL NECESSITY REVIEW**

Required if > \$1,000.00 for most plans

Required if > \$500.00 for Medicaid/Healthy Michigan Plan members

Prior authorization for certain drug, services, and procedures may or may not be required. In cases where prior authorization is required, providers will submit a request demonstrating that a drug, service, or procedure is medically necessary. For more information, please refer to the [Priority Health Provider Manual](#).

To access InterQual guidelines policies: Log into [Priority Health Prism](#) → Authorizations → Authorization Criteria Lookup.

### IV. DESCRIPTION

Orthotics/support devices may be a covered benefit when the criteria and definitions above are met. Limitations and exclusions are defined above and in plan documents.

The following definitions are from [MedicineNet, Inc](#):

**Orthotic:** A support, brace, or splint used to support, align, prevent, or correct the function of movable parts of the body. Shoe inserts are orthotics that are intended to correct an abnormal or irregular walking pattern, by altering slightly the angles at which the foot strikes a walking or running surface. Other orthotics include neck braces, lumbosacral supports, knee braces, and wrist supports.

**Prosthesis:** An artificial replacement of a part of the body, such as a tooth, a facial bone, the palate, or a joint. A prosthesis may be removable, as in the case of most prosthetic legs or a prosthetic breast form used after mastectomy. Other types of prosthetic devices, such as artificial hips or teeth, are permanently implanted. With advances in medical science, a few experimental prostheses have been integrated with body tissues, including the nervous system. These highly advanced devices can respond to commands from the central nervous system, more closely approximating normal movement and utility than older prostheses.

**Myoelectric and/or power enhanced upper extremity orthotic devices (e.g., MyoPro)**

According to the United States Food and Drug Administration (FDA), Myomo Inc. received 510(k) approval for the Myomo e100 in 2007 as a Class 2 device, described further as exercise equipment, powered, EMG-triggered. The device is indicated for use by stroke patients undergoing rehabilitation to facilitate stroke rehabilitation by muscle re-education, and/or maintaining or increasing range of motion. Evidence in the peer-reviewed published scientific literature evaluating an upper limb myoelectric orthotic device consists of review articles, mainly retrospective observational studies, and few randomized controlled trials with small patient populations, reporting short term outcome. Although myoelectric powered upper extremity orthotic devices are an evolving technology, more recently including those manufactured using 3D technology, additional well-designed, large-scale clinical studies evaluating benefits and harms of this technology after stroke and other neurological injuries are needed to firmly establish safety and clinical efficacy.
