**MEDICAL POLICY**  
No. 91538-R7

*VISION CARE*

**Effective Date:** August 20, 2018  
**Review Dates:** 7/07, 4/08, 4/09, 4/10, 4/11, 4/12, 4/13, 5/14, 5/15, 5/16, 5/17, 5/18  
**Date Of Origin:** July 2007  
**Status:** Current

*Note this policy incorporates the previously separate policy Contact Lenses/Eyeglasses #91425 and the title of this policy changed from Vision Care/Eye Exam to Vision Care.*

**Summary of Changes**

**Clarifications:**
- Pg. 4, Section I, G, criteria updated to reflect “FDA approved” bypass stents for the treatment of open-angle glaucoma in combination with cataract surgery are a covered benefit.

**Deletions:**
- 

**Additions:**
- 

**I. POLICY/Criteria**

An eye exam is not a covered benefit for common vision conditions, such as myopia, presbyopia, hyperopia, astigmatism. An eye exam performed by an ophthalmologist or optometrist is a covered benefit when a specific ophthalmic disease, medical condition or infective process is being monitored or treated such as glaucoma, diabetic retinopathy, cataracts, macular degeneration, keratoconus, strabismus and amblyopia.

Vision care, services, and supplies that are not related to a specific medical or surgical condition covered by this policy may be covered with a rider, group contract language or a stand-alone Vision policy. Pediatric Vision coverage is an essential health benefit under Individual ACA and Small Business ACA plans. Refer to plan documents.

**A. Eye Exams**

- Eye exams are a covered benefit for members when seen by an ophthalmologist for the purpose of treatment or diagnosis of a specific illness, symptom, or complaint.
- Refraction examinations for assessment of visual acuity are not covered. (Vision coverage for refraction may be a benefit if a vision rider has been purchased – see specific rider language for coverage details.)
- Comprehensive eye exams in the absence of known diseases affecting the eye are not covered.
- If, after a refractive eye exam initiated by the member (which would not be covered), an ophthalmic medical condition is found (e.g., glaucoma, retinal disease, etc.), subsequent diagnosis and treatment is covered. See
medical policy #91529 Refractive Keratoplasty for specific covered
conditions and criteria for refractive keratoplasty.

B. Diabetic Screening Eye Exams
   - A self-referred, yearly diabetic eye exam (dilated eye exam) to screen for
     retinal disease for a diabetic member is a covered benefit for members
     when performed by an ophthalmologist or optometrist, or by the PCP
     when DigiScope/EyeTel services are available.
   - If after a yearly diabetic eye exam, a new ophthalmic medical condition is
     found, subsequent diagnosis and treatment is covered.

C. Contact lenses / eyeglasses and associated services and supplies are a covered
benefit only for the specific medical or surgical conditions listed below and
must be provided by an ophthalmologist or optometrist.

**Special Note:** Vision care, services, and supplies may be covered with a rider,
group contract language or a stand-alone Vision policy.

1. Aphakia. Absence of the lens may be either surgical (cataract
   extraction) or congenital. **Coverage for aphakia is available only if
an intraocular lens (IOL) is not present and lenses are paid at the
prosthetic benefit level.**
   a. Surgical aphakia. Refractive lenses are covered for up to six
      months post-cataract surgery as follows:
      - One pair of glasses or contact lenses per eye per lifetime
      - Traditional single, bifocal or trifocal lenses
      - Basic frames are covered only in conjunction with covered
        lenses
   b. Congenital aphakia. Refractive lenses are covered annually as
      follows:
      - One pair of glasses or contact lenses per eye
      - Traditional single, bifocal or trifocal lenses
      - Basic frames are covered only in conjunction with covered
        lenses

2. Contact lenses for corneal pathology. Coverage is provided only for
the initial pair of contact lenses when used as a corneal bandage for
 treatment of acute or chronic corneal pathology (e.g. keratitis, corneal
 ulcers, keratoconus).
3. Intrastromal corneal ring segments (e.g., INTACS® prescription inserts) are considered to be medically necessary in patients with keratoconus who meet ALL of the following criteria:
   - progressive deterioration in vision, such that adequate functional vision on a daily basis with contact lenses or spectacles can no longer be achieved
   - age 21 years of age or older
   - clear central corneas
   - corneal thickness of 450 microns or greater at the proposed incision site
   - corneal transplantation is the only other remaining option for improving functional vision

4. Intraocular lens:

   The cost of conventional IOLs only are a covered benefit. If the member selects anything other than a standard IOL, i.e. a presbyopia-correcting IOL or other non-standard IOL, the cost of the additional function is not a covered benefit. (See code description.)

D. Contact lenses coverage criteria for Medicaid/Healthy Michigan Plan members

1. Priority Health provides services for contact lenses for Medicaid/Healthy Michigan Plan members who have certain medical conditions. These services include comprehensive contact lens evaluation with fitting and contact lenses.

   a. A comprehensive contact lens evaluation is a benefit for Medicaid/Healthy Michigan Plan members and does not require prior authorization when the member presents with one of the following conditions and visual performance is expected to be significantly improved with the application of a contact lens. Documentation must be available if requested.

      - Aphakia (congenital or surgical).
      - Keratoconus (if vision cannot be improved to 20/40 or better with eyeglasses).
      - Anisometropia or Antimetropia (of two diopters or greater that results in aniseikonia).
      - Other conditions which have no alternative treatment.

   b. Limitations

      - One contact lens replacement in a year for each eye is allowed for Medicaid/Healthy Michigan Plan members age 21 and over.
• Two replacements per year are allowed for each eye for Medicaid/Healthy Michigan Plan members under age 21. (One year is defined as 365 days from the date the first pair of contact lenses (initial or subsequent) was ordered.

E. Prosthesis (See also policy #91306 External Prosthetics)
A scleral shell to support a loss of orbital tissue is a covered benefit when an eye has been rendered sightless and shrunken by inflammatory disease.

An ocular prosthesis (artificial eye) is a covered benefit for members with an absence of an eye due to trauma, surgical removal or congenital defect.

Polishing and resurfacing of an ocular prosthesis is covered on an annual basis.

Replacement of an ocular prosthesis is covered every five years unless documentation supports the medical necessity of more frequent replacement.

F. Vision therapy / orthoptics: Office-based vision therapy / orthoptics is covered as a treatment only for convergence insufficiency (CI) in children. Use of this treatment / therapy for any other indication / diagnosis is considered to be experimental and investigational and is not a covered benefit.

Note: Coverage is subject to physical and occupational therapy benefit limits and applicable copays.

G. FDA-approved bypass stents for the treatment of open-angle glaucoma in combination with cataract surgery are a covered benefit.

H. General Exclusions
The following are not covered benefits:
- Refractive services unless covered by a vision rider
- Routine glaucoma screening
- Low vision aids
- Refractive keratoplasty (see medical policy #91529)
- Replacement for loss, damage, misuse or abuse is not a covered benefit.
- Coverage is not provided for: sunglasses, scratch resistant coating, transition/progressive lenses, or contact lens supplies (e.g. wetting and cleaning solutions, carrying cases).
- Artificial retina devices (e.g., the Argus™ II) are considered experimental and investigational and not a covered benefit because there is insufficient scientific evidence of the safety and effectiveness of these devices in restoring vision.

These devices provide electrical stimulation of the retina to induce visual perception in blind patients with severe to profound retinitis pigmentosa.
and bare light or no light perception in both eyes. The effectiveness of these devices has not been demonstrated.

*For Medicaid/Healthy Michigan Plan members, please refer to medical policy #91500 Orthoptic and Pleoptic Training for Medicaid Members.

II. MEDICAL NECESSITY REVIEW

☐ Required ☒ Not Required ☐ Not Applicable

III. APPLICATION TO PRODUCTS

Coverage is subject to member’s specific benefits. Group specific policy will supersede this policy when applicable.

- **HMO/EPO:** This policy applies to insured HMO/EPO plans.
- **POS:** This policy applies to insured POS plans.
- **PPO:** This policy applies to insured PPO plans. Consult individual plan documents as state mandated benefits may apply. If there is a conflict between this policy and a plan document, the provisions of the plan document will govern.
- **ASO:** For self-funded plans, consult individual plan documents. If there is a conflict between this policy and a self-funded plan document, the provisions of the plan document will govern.
- **INDIVIDUAL:** For individual policies, consult the individual insurance policy. If there is a conflict between this medical policy and the individual insurance policy document, the provisions of the individual insurance policy will govern.
- **MEDICARE:** Coverage is determined by the Centers for Medicare and Medicaid Services (CMS); if a coverage determination has not been adopted by CMS, this policy applies.
- **MEDICAID/HEALTHY MICHIGAN PLAN:** For Medicaid/Healthy Michigan Plan members, this policy will apply. Coverage is based on medical necessity criteria being met and the appropriate code(s) from the coding section of this policy being included on the Michigan Medicaid Fee Schedule located at: [http://www.michigan.gov/mdch/0,1607,7-132-2945-42542-42543-42546-42551-159815--00.html](http://www.michigan.gov/mdch/0,1607,7-132-2945-42542-42543-42546-42551-159815--00.html). If there is a discrepancy between this policy and the Michigan Medicaid Provider Manual located at: [http://www.michigan.gov/mdch/0,1607,7-132-2945-5100-87572--00.html](http://www.michigan.gov/mdch/0,1607,7-132-2945-5100-87572--00.html), the Michigan Medicaid Provider Manual will govern. If there is a discrepancy or lack of guidance in the Michigan Medicaid Provider Manual, the Priority Health contract with Michigan Medicaid will govern. For Medical Supplies/DME/Prosthetics and Orthotics, please refer to the Michigan Medicaid Fee Schedule to verify coverage.
- **MICHILD:** For MICHILD members, this policy will apply unless MICHILD certificate of coverage limits or extends coverage.

IV. DESCRIPTION

A. A comprehensive eye evaluation is performed to detect and diagnose ocular, visual and systemic disease. The following elements are normally included in a comprehensive eye exam:

- Member’s family and personal health history
• Visual acuity with present correction (the power of the present correction recorded) at distance and at near
• Ocular alignment and motility
• Pupillary function
• Intraocular pressure measurement
• Visual fields by confrontation when indicated
• External examination: lids, lashes and lacrimal apparatus, orbit and pertinent facial features
• Slit-lamp examination: eyelid margins and lashes, tear film, conjunctiva, sclera, cornea, anterior chamber and assessment of peripheral anterior chamber depth, iris, lens and anterior vitreous
• Examination of the fundus: vitreous, retina (including posterior pole and periphery), vasculature and optic nerve

B. The following are considered to be common vision conditions:
• Myopia (nearsightedness) - A vision condition in which near objects are seen clearly, but distant objects do not come into proper focus. Nearsightedness is very common.
• Presbyopia - A condition in which the crystalline lens of the eye loses its flexibility, making it difficult to focus on close objects. Presbyopia, usually becomes noticeable in the early to mid-forties, and is a natural part of the aging process of the eye. It is not a disease and it cannot be prevented.
• Hyperopia (farsightedness) - A condition in which distant objects are usually seen clearly, but close objects do not come into proper focus.
• Astigmatism - A condition that occurs when the front surface of the eye, the cornea, is slightly irregular in shape. This irregular shape prevents light from focusing properly on the retina. Almost all levels of astigmatism can be optically corrected with eyeglasses and/or contact lenses.

C. The following are considered to be medical disorders:
• Strabismus - A condition when one or both eyes turns in, out, up or down. Poor eye muscle control usually causes misalignment of the eyes.
• Amblyopia (lazy eye) - A loss or lack of development of central vision in one eye that is unrelated to any eye health problem and not correctable with lenses. It can result from a failure to use both eyes together. Lazy eye is often associated with crossed-eyes or a large difference in the degree of nearsightedness or farsightedness between the two eyes.
• Cataract - The clouding of all or part of the normally clear lens within the eye, which results in blurred or distorted vision.

D. The following are ophthalmic diseases:
• Glaucoma - A disease in which the internal pressure of the eyes increase enough to damage the nerve fibers in the optic nerve and cause vision loss. The increase in pressure occurs when the passages that normally allow
fluid in the eyes to drain become blocked. Glaucoma cannot be prevented, but if diagnosed and treated early, can be controlled. Vision lost to glaucoma cannot be restored.

- Macular degeneration - A condition that results from changes to the macula, a portion of the retina that is responsible for clear, sharp vision.
- Diabetic retinopathy - A condition occurring as a result of diabetes which causes weakening and changing of the small blood vessels that nourish the eye’s retina. Early treatment is important to avoid permanent damage and blindness.
- Keratoconus - A vision disorder that occurs when the cornea becomes thin and irregularly shaped. This abnormal shape prevents the light entering the eye from being focused correctly on the retina and causes distortion of vision. Treatment can be divided into three tiers; correction with glasses, correction with rigid gas permeable contact lenses for more progressive cases and possibly corneal transplantation.

V. CODING INFORMATION:

Routine Vision diagnoses:
Services billed with the following diagnoses are subject to Vision Rider

ICD-10 Codes that apply to this policy:
H52.00 - H52.03 Hypermetropia  
H52.10 - H52.13 Myopia  
H52.201 - H52.209 Astigmatism, Unspecified  
H52.211 - H52.219 Irregular Astigmatism  
H52.221 - H52.229 Regular astigmatism  
H52.31 Anisometropia  
H52.32 Aniseikonia  
H52.4 Presbyopia  
H52.6 Other disorders of refraction  
H52.7 Unspecified disorder of refraction  
Z01.00 - Z01.01 Encounter for examination of eyes and vision

CPT/HCPCS Codes:
Listing of code does not guarantee coverage for all plans and provider specialties; some services are covered with optional vision benefits. List is not inclusive of all possible vision services

Services that may be payable to Optometrists

0190T Placement of intraocular radiation source applicator (List separately in addition to primary procedure) (Not covered for Priority Health Medicare)
0191T Insertion of anterior segment aqueous drainage device, without extraocular reservoir; internal approach
0253T Insertion of anterior segment aqueous drainage device, without extraocular reservoir; internal approach, into the suprachoroidal space (Not covered for Priority Medicaid)
0308T Insertion of ocular telescope prosthesis including removal of crystalline lens or intraocular lens prosthesis  (Not covered for Medicaid)

0376T Insertion of anterior segment aqueous drainage device, without extraocular reservoir, internal approach, into the trabecular meshwork; each additional device insertion (List separately in addition to code for primary procedure)

0402T Collagen cross-linking of cornea (including removal of the corneal epithelium and intraoperative pachymetry when performed)  (Not covered for Medicaid)

0449T Insertion of aqueous drainage device, without extraocular reservoir, internal approach, into the subconjunctival space; initial device  (Not covered for Medicaid)

0450T Insertion of aqueous drainage device, without extraocular reservoir, internal approach, into the subconjunctival space; each additional device (List separately in addition to code for primary procedure)  (Not covered for Medicaid)

0474T Insertion of anterior segment aqueous drainage device, with creation of intraocular reservoir, internal approach, into the supraciliary space  (Not covered for Medicaid)

65205 Remove foreign body, external eye; conjunctival superficial

65210 Removal of foreign body, external eye; conjunctival embedded (includes concretions), subconjunctival, or scleral nonperforating  (Not covered for Optometrist for Medicaid)

65220 Removal of foreign body, external eye; corneal, without slit lamp

65222 Removal of foreign body, external eye; corneal, with slit lamp

65235 Removal of foreign body, intraocular; from anterior chamber of eye or lens

65260 Removal of foreign body, intraocular; from posterior segment, magnetic extraction, anterior or posterior route

65265 Removal of foreign body, intraocular; from posterior segment, nonmagnetic extraction

65430 Scraping of cornea, diagnostic, for smear and/or culture

65435 Removal of corneal epithelium; with or without chemocauterization (abrasion, curettage)

65436 Removal of corneal epithelium; with application of chelating agent (eg, EDTA)

65600 Multiple punctures of anterior cornea (eg, for corneal erosion, tattoo)

65778 Placement of amniotic membrane on the ocular surface; without sutures

66174 Transluminal dilation of aqueous outflow canal; without retention of device or stent

66175 Transluminal dilation of aqueous outflow canal; with retention of device or stent

66179 Aqueous shunt to extraocular equatorial plate reservoir, external approach; without graft

66183 Insertion of anterior segment aqueous drainage device, without extraocular reservoir, external approach

66184 Revision of aqueous shunt to extraocular equatorial plate reservoir; without graft

66185 Revision of aqueous shunt to extraocular equatorial plate reservoir; with graft

(Cataract surgical codes subject to CoManagement billing rules – see Provider Manual)
66982 Extracapsular cataract removal with insertion of intraocular lens prosthesis (1-stage procedure), manual or mechanical technique (eg, irrigation and aspiration or phacoemulsification), complex, requiring devices or techniques not generally used in routine cataract surgery (eg, iris expansion device, suture support for intraocular lens, or primary posterior capsulorrhexis) or performed on patients in the amblyogenic developmental stage

66983 Intracapsular cataract extraction with insertion of intraocular lens prosthesis (1 stage procedure)

66984 Extracapsular cataract removal with insertion of intraocular lens prosthesis (1 stage procedure), manual or mechanical technique (eg, irrigation and aspiration or phacoemulsification)

66985 Insertion of intraocular lens prosthesis (secondary implant), not associated with concurrent cataract removal

67820 Correction of trichiasis; epilation, by forceps only
67938 Removal of embedded foreign body, eyelid
68020 Incision of conjunctiva, drainage of cyst
68040 Expression of conjunctival follicles (eg, for trachoma)
68760 Closure of the lacrimal punctum; by thermocauterization, ligation, or laser surgery
68761 Closure of the lacrimal punctum; by plug, each
68801 Dilation of lacrimal punctum, with or without irrigation

76510 Ophthalmic ultrasound, diagnostic; b-scan and quantitative a-scan performed during the same patient encounter
76511 Ophthalmic ultrasound, diagnostic; quantitative A-scan only
76512 Ophthalmic ultrasound, diagnostic; B-scan (with or without superimposed non-quantitative A-scan)
76513 Ophthalmic ultrasound, diagnostic; anterior segment ultrasound, immersion (water bath) b-scan or high resolution biomicroscopy
76514 Ophthalmic ultrasound, diagnostic; corneal pachymetry, unilateral or bilateral (determination of corneal thickness)
76516 Ophthalmic biometry by ultrasound echography, A-scan;
76519 Ophthalmic biometry by ultrasound echography, A-scan; with intraocular lens power calculation
76529 Ophthalmic ultrasonic foreign body localization

92002 Ophthalmological services: medical examination and evaluation with initiation of diagnostic and treatment program; intermediate, new patient
92004 Ophthalmological services: medical examination and evaluation with initiation of diagnostic and treatment program; comprehensive, new patient, one or more visits
92012 Ophthalmological services: medical examination and evaluation, with initiation or continuation of diagnostic and treatment program; intermediate, established patient
92014 Ophthalmological services: medical examination and evaluation, with initiation or continuation of diagnostic and treatment program; comprehensive, established patient, 1 or more visits
92015 Determination of refractive state (Vision benefit only)

V2100 Sphere, single vision, plano to plus or minus 4.00, per lens
V2101 Sphere, single vision, plus/minus 4.12 to plus/minus 7.00d, per lens
V2102 Sphere, single vision, plus/minus 7.12 to plus/minus 20.00d, per lens
V2103 Spherocyl, sgl vision, plano to plus/minus 4.00d sphere, 2.12 to 4.00d cyl, per lens
V2104 Spherocyl, sgl vision, plano to plus/minus 4.00d sph, 2.12 to 400d cyl, per lens
V2105 Spherocyl, sgl vision, plano to plus/minus 4.00d sph, 4.25-6.00d cyl, per lens
V2106 Spherocyl, sgl vision, plano to plus/minus 4.00d sph, over 6.00d cyl, per lens
V2107 Spherocyl, sgl vision, plus/minus 4.25-plus/minus 7.00 sph, 0.12-2.00d cyl, per lens
V2108 Spherocyl, sgl vis, plus/minus 4.25d-plus/minus 7.00d sph, 2.12-4.00d cyl, per lens
V2109 Spherocyl, sgl vis, plus/minus 4.25d-plus/minus 7.00d sph, 4.25-6.00d cyl, per lens
V2110 Spherocyl, sgl vis, plus/minus 4.25-7.00d sph, over 6.00d cylinder, per lens
V2111 Spherocyl, sgl vis, plus/minus 7.25-plus/minus 12.00d sph, 0.25-2.25d cyl, per lens
V2112 Spherocyl, sgl vis, plus/minus 7.25-plus/minus 12.00d sph, 2.25d-4.00d cyl, per lens
V2113 Spherocyl, sgl vis, plus/minus 7.25-plus/minus 12.00d sph, 4.25-6.00d cyl, per lens
V2114 Spherocyl, sgl vision sphere over plus/minus 12.00d, per lens
V2115 Lenticular (myodisc), per lens, single vision
V2118  Aniseikonic lens, single vision  *(Not Covered for Priority Health Medicaid)*
V2200  Sphere, bifocal, plano to plus/minus 4.00d, per lens
V2201  Sphere, bifocal, plus/minus 4.12-plus/minus 7.00d, per lens
V2202  Sphere, bifocal, plus/minus 7.12-plus/minus 20.00d, per lens
V2203  Spherocyl, bifocal, plano to plus/minus 4.00d sph, 0.12-2.00d cyl, per lens
V2204  Spherocyl, bifocal, plano to plus/minus 4.00d sph, 2.12-4.00d cyl, per lens
V2205  Spherocyl, bifocal, plano to plus/minus 4.00d sph, 4.25-6.00d cyl, per lens
V2206  Spherocyl, bifocal, plano to plus/minus 4.00d sph, over 6.00d cyl, per lens
V2207  Spherocyl, bifocal, plus/minus 4.25-plus/minus 7.00d sph, 0.12-2.00d cyl, per lens
V2208  Spherocyl, bifocal, plus/minus 4.25-plus/minus 7.00d sph, 2.12-4.00d cyl, per lens
V2209  Spherocyl, bifocal, plus/minus 4.25-plus/minus 7.00d sph, 4.25-6.00d cyl, per lens
V2210  Spherocyl, bifocal, plus/minus 4.25-plus/minus 7.00d sph, over 6.00d cyl, per lens
V2211  Spherocyl, bifocal, plus/minus 7.25-plus/minus 12.00d sph, 0.25-2.25d cyl, per lens
V2212  Spherocyl, bifocal, plus/minus 7.25-plus/minus 12.00d sph, 2.25-4.00d cyl, per lens
V2213  Spherocyl, bifocal, plus/minus 7.25-plus/minus 12.00d sph, 4.25-6.00d cyl, per lens
V2214  Spherocylinder, bifocal, sphere over plus/minus 12.00d, per lens
V2215  Lenticular (myodisc), per lens, bifocal *(Not Covered for Priority Health Medicaid)*
V2218  Aniseikonic, per lens, bifocal *(Not Covered for Priority Health Medicaid)*
V2219  Bifocal seg width over 28mm
V2220  Bifocal add over 3.25d
V2221  Lenticular lens, per lens, bifocal
V2299  Specialty bifocal (by report)
V2300  Sphere, trifocal, plano to plus/minus 4.00d, per lens
V2301  Sphere, trifocal, plus/minus 4.12 to plus/minus 7.00d per lens
V2302  Sphere, trifocal, plus/minus 7.12 to plus/minus 20.00, per lens
V2303  Spherocyl, trifocal, plano to plus/minus 4.00d sph, 0.12-2.00d cyl, per lens
V2304  Spherocyl, trifocal, plano to plus/minus 4.00d sph, 2.25-4.00d cyl, per lens
V2305  Spherocyl, trifocal, plano to plus/minus 4.00d sph, 4.25-6.00d cyl, per lens
V2306  Spherocyl, trifocal, plano to plus/minus 4.00d sph, over 6.00d cyl, per lens
V2307  Spherocyl, trifocal, plus/minus 4.25-plus/minus 7.00d sph, 0.12-2.00d cyl, per lens
V2308  Spherocyl, trifocal, plus/minus 4.25-plus/minus 7.00d sph, 2.12-4.00d cyl, per lens
V2309  Spherocyl, trifocal, plus/minus 4.25-plus/minus 7.00d sph, 4.25-6.00d cyl, per lens
V2310  Spherocyl, trifocal, plus/minus 4.25-plus/minus 7.00d sph, over 6.00d cyl, per lens
V2311  Spherocyl, trifocal, plus/minus 7.25-plus/minus 12.00d sph, 0.25-2.25d cyl, per lens

Mod U2  High Index Lenses

**Not Covered for all products:**

0100T  Placement of a subconjunctival retinal prosthesis receiver and pulse generator, and implantation of intra-ocular retinal electrode array, with vitrectomy  
*covered by Medicare*

C1841  Retinal prosthesis, includes all internal and external components

0198T  Measurement of ocular blood flow by repetitive intraocular pressure sampling, with interpretation and report

0290T  Corneal incisions in the recipient cornea created using a laser, in preparation for penetrating or lamellar keratoplasty (List separately in addition to code for primary procedure)  
*Not separately payable*

0329T  Monitoring of intraocular pressure for 24 hours or longer, unilateral or bilateral, with interpretation and report

0330T  Tear film imaging, unilateral or bilateral, with interpretation and report

0333T  Visual evoked imaging, screening of visual acuity, with report

0356T  Insertion of drug-eluting implant (including punctual dilation and implant removal when performed) into lacrimal canaliculus, each

0378T  Visual field assessment, with concurrent real time data analysis and accessible data storage with patient initiated data transmitted to a remote surveillance center for up to 30 days; review and interpretation with report by a physician or other qualified health care professional

0379T  Visual field assessment, with concurrent real time data analysis and accessible data storage with patient initiated data transmitted to a remote surveillance center for up to 30 days; technical support and patient instructions, surveillance, analysis and transmission of daily and emergent data reports as prescribed by a physician or other qualified health care professional

0380T  Computer-aided animation and analysis of time series retinal images for the monitoring of disease progression, unilateral or bilateral, with interpretation and report  
*Not separately payable*

0444T  Initial placement of a drug-eluting ocular insert under one or more eyelids, including fitting, training, and insertion, unilateral or bilateral

0445T  Subsequent placement of a drug-eluting ocular insert under one or more eyelids, including re-training, and removal of existing insert, unilateral or bilateral

0464T  Visual evoked potential, testing for glaucoma, with interpretation and report

0465T  Suprachoroidal injection of a pharmacologic agent (does not include supply of medication)

0469T  Retinal polarization scan, ocular screening with on-site automated results, bilateral

0472T  Device evaluation, interrogation, and initial programming of intraocular retinal electrode array (eg, retinal prosthesis), in person, with iterative adjustment of the implantable device to test functionality, select optimal permanent programmed values with analysis, including visual training, with review and report by a qualified health care professional

0473T  Device evaluation and interrogation of intra-ocular retinal electrode array (eg, retinal prosthesis), in person, including reprogramming and visual training, when performed, with review and report by a qualified health care professional
0506T  Macular pigment optical density measurement by heterochromatic flicker photometry, unilateral or bilateral, with interpretation and report  *(effective 7-1-2018)*

0507T  Near-infrared dual imaging (ie, simultaneous reflective and trans-illuminated light) of meibomian glands, unilateral or bilateral, with interpretation and report  *(effective 7-1-2018)*

92015  Determination of refractive state  *(Vision benefit only)*

92145  Corneal hysteresis determination, by air impulse stimulation, unilateral or bilateral, with interpretation and report

92354  Fitting of spectacle mounted low vision aid; single element system

92355  Fitting of spectacle mounted low vision aid; telescopic or other compound lens system

S0510  Nonprescription lens (safety, athletic, or sunglass), per lens

S0512  Daily wear specialty contact lens, per lens

S0514  Color contact lens, per lens

S0518  Sunglasses frames

S0580  Polycarbonate lens (list this code in addition to the basic code for the lens)

S0581  Non-standard lens code  *(Covered for Priority Health Medicaid only)*

S0590  Integral lens service, miscellaneous services reported separately

S0592  Comprehensive contact lens evaluation

S0595  Dispensing new spectacle lenses for patient supplied frame

V2025  Deluxe frame

V2600  Hand held low vision aids & other nonspectacle mounted aids  *(Covered for Priority Health Medicaid only)*

V2610  Single lens spectacle mounted low vision aids  *(Covered for Priority Health Medicaid only)*

V2615  Telescopic and other compound lens system, including distance vision telescopic, near vision telescopes and compound microscopic lens system  *(Covered for Priority Health Medicaid only)*

V2702  Deluxe lens feature

V2750  Antireflective coating, per lens

V2756  Eye glass case

V2787  Astigmatism correcting function of intraocular lens

V2788  Presbyopia correcting function of intraocular lens

G9041  Low vision rehabilitation services, qualified occupational therapist, direct face-to-face one-on one, each 15 minutes

G9042  Low vision rehabilitation services, certified orientation and mobility specialist, direct face-to-face one-on-one, each 15 minutes

G9043  Low vision rehabilitation services, certified low vision therapist, direct face-to-face one-on-one, each 15 minutes

G9044  Low vision rehabilitation services, qualified rehabilitation teacher, direct face-to-face one-on-one, each 15 minutes
ICD-10 Codes that codes that support medical necessity for contact lenses and the procedures below:

A18.52 Tuberculous keratitis
B09 Unspecified viral infection characterized by skin and mucous membrane lesions
H16.001 - H16.009 Unspecified corneal ulcer
H16.011 - H16.019 Central corneal ulcer
H16.021 - H16.029 Ring corneal ulcer
H16.031 - H16.039 Corneal ulcer with hypopyon
H16.041 - H16.049 Marginal corneal ulcer
H16.051 - H16.059 Mooren's ulcer
H16.061 - H16.069 Mycotic corneal ulcer
H16.071 - H16.079 Perforated corneal ulcer
H16.101 - H16.109 Unspecified superficial keratitis
H16.111 - H16.119 Macular keratitis
H16.121 - H16.129 Filamentary keratitis
H16.131 - H16.139 Photokeratitis
H16.141 - H16.149 Punctate keratitis
H16.201 - H16.209 Unspecified keratoconjunctivitis
H16.211 - H16.219 Exposure keratoconjunctivitis
H16.221 - H16.229 Keratoconjunctivitis sicca, not specified as Sjogren's
H16.231 - H16.239 Neurotrophic keratoconjunctivitis
H16.251 - H16.259 Phlyctenular keratoconjunctivitis
H16.261 - H16.269 Vernal keratoconjunctivitis, with limbar and corneal involvement
H16.291 - H16.299 Other keratoconjunctivitis
H16.301 - H16.309 Unspecified interstitial keratitis
H16.311 - H16.319 Corneal abscess
H16.331 - H16.339 Sclerosing keratitis
H16.391 - H16.399 Other interstitial and deep keratitis
H18.601 - H18.609 Keratoconus, unspecified
H18.611 - H18.619 Keratoconus, stable
H18.621 - H18.629 Keratoconus, unstable
H18.831 - H18.839 Recurrent erosion of cornea
H52.31 Anisometropia (Contact lens for Priority Health Medicare & Medicaid only)
Q12.0 Congenital cataract (over age 6 only – for Medicaid)
Q12.1 Congenital displaced lens
Q12.9 Congenital lens malformation, unspecified

CPT Codes:
92311 Prescription of optical and physical characteristics of and fitting of contact lens, with medical supervision of adaptation; corneal lens for aphakia, one eye
92312 Prescription of optical and physical characteristics of and fitting of contact lens, with medical supervision of adaptation; corneal lens for aphakia, both eyes
92313 Prescription of optical and physical characteristics of and fitting of contact lens, with medical supervision of adaptation; corneoscleral lens
92314 Prescription of optical and physical characteristics of contact lens, with medical supervision of adaptation and direction of fitting by independent technician; corneal lens  *(Not Covered for Priority Health Medicaid)*
92315 Prescription of optical and physical characteristics of contact lens, with medical supervision of adaptation and direction of fitting by independent technician; corneal lens for aphakia, one eye  *(Not Covered for Priority Health Medicaid)*
92316 Prescription of optical and physical characteristics of contact lens, with medical supervision of adaptation and direction of fitting by independent technician; corneal lens for aphakia, both eyes  *(Not Covered for Priority Health Medicaid)*
92317 Prescription of optical and physical characteristics of contact lens, with medical supervision of adaptation and direction of fitting by independent technician; corneoscleral lens  *(Not Covered for Priority Health Medicaid)*
92325 Modification of contact lens  *(Not Covered for Priority Health Medicaid)*
92326 Replacement of contact lens

**ICD-10 Codes** that codes that support medical necessity for the procedures below:
H18.21 - H18.629  Keratoconus, unstable
H18.40  Unspecified corneal degeneration
H18.601 - H18.609  Keratoconus, unspecified
H18.611 - H18.619  Keratoconus, stable
Q13.4  Other congenital corneal malformations

**CPT Codes:**
65785  Implantation of intrastromal corneal ring segments

**Special Note:** Vision care, services, and supplies may be covered with a rider, group contract language or a stand-alone vision policy.
