DENTAL EXTRACTIONS

Priority Health will pay for dental extractions of sound, natural teeth if extractions of the sound, natural teeth are required in preparation or as part of another medically necessary treatment. For example, patients who have oral cancers including squamous carcinomas of the buccal mucosa or tonsils, need removal of sound, natural teeth to prevent osteoradionecrosis. If the teeth are not sound teeth then Priority Health will not pay to have them removed. The definition of a sound tooth is a tooth without evidence of current dental decay or other pathology. Tooth extractions are subject to Dental benefits. Upon request, claims for medical teeth extraction will be reviewed against policy and if criteria are met, the claim may be re-processed for payment retrospectively. If extraction is authorized, any and all restoration procedures are not a covered benefit.

Medicaid and Healthy Michigan Plan Members: Dental extractions are not a covered benefit through the health plan.
