

Online education helps prepare you for surgery

REGISTER TODAY

Knowledge is power. That's why we want you to have as much information as possible throughout your health care journey. To prepare for surgery, you need to watch an online video to understand the recommended heart procedure.

The 30 minute video will help you understand:

- Risks and benefits of the procedure
- Potential complications
- Treatment alternatives
- What you need to do before and after surgery to get the best results

You can watch the video from your computer, Smartphone or tablet. Information complements what you've already learned from your provider.

WHAT YOU NEED TO DO

1. Register at my-emmi.com/SelfReg/PHIC.
2. Select your procedure as prescribed by your doctor.
 - Defib – Cardiac resynchronization therapy
 - Defib – Implantable cardioverter defibrillator
3. Complete the online education.

You can watch the video multiple times and share with family and friends, too.

Questions?

Email support@emmisolutions.com, call 866.294.3664 or contact your health care provider.

Priority Health Medicare has HMO-POS and PPO plans with a Medicare contract. Enrollment in Priority Health Medicare depends on contract renewal.

MEMBER RESPONSE

"The education was one of the best explanations that I've received about my procedure. It made me think of some questions I never thought to ask. Thank you!"

"All the information was very helpful and made my decision even easier. I understand exactly what's going to happen. I really enjoyed all the detailed information."
